About AlbaMod

AlbaMod is a 1v1 FPS inspired by the likes of Quake, Straftat and Titanfall2. As a voice actor you will be playing a character in game which will have unique voice lines for deaths and kills that build upon the story of the “hero”.

Lore-ish stuff:

AlbaMod is an interconnected series of worlds linked together via cables, set in a hyper saturated dystopian environment. Inspiration was taken from previous projects I’ve worked on called Nightingale (story for that in Appendix 1) and by extension I Have No Mouth An I Must Scream. Each character is a “Nightingale”, a mercenary for an unnamed shadow organisation.
